About us

Supreme Associates Traders established in 2008 by water professional. Now, we are pioneer and leader in water and waste water treatment system served and satisfied thousands of customers throughout the country.

Customization, designing through state-of-art, continuous improvement and specialized and long experienced team of expert, engineers, support technicians, the organization within short span of time has crossed the milestone and set up the new unbeatable benchmarks for its competitors.

We believe customers satisfaction, social responsibility a backbone of organization and key to success. Therefore, regular maintenance, servicing, warranty and response complaint promptly within the single source of responsibility.

Why Us?

Latest and Innovative Technology:

Our research team are continuously developing new and latest design, assembling process. We are involved to get innovative products and solution in the water field.

One Stop Solutions:

We design, fabricate, assemble and supply all kinds of products for treatment of water and service at one place.

Qualified and Committed Team:

We have qualified, experienced and professional experts, engineers, support technician, management team who have worked for long time in water industry.

Quality Products:

We are exclusively involved in supplying, installation, fabrication and commissioning of branded and innovative products of various ranges.

Affordable Price:

We believe in the low margin profit but we are concerned in the satisfaction of customers. Therefore, we are providing our products and services at lower rate than available in market.

Constant Availability:

We believe in enduring relationship with customers always same with our services.

After Sales Service:

Our concerned is always for the satisfaction of customers. Therefore, we take feedback, action on complaint and provide maintenance services after the product is sold.

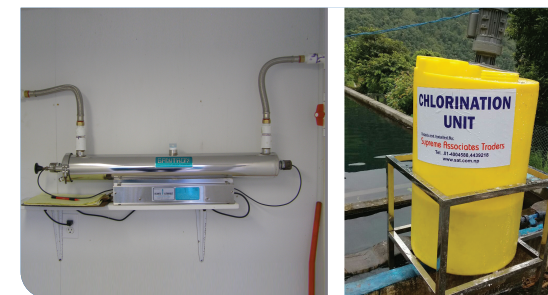

Filters

- ♦ Iron Removal
- ♦ Dual Media Filter
- ♦ Activated Carbon Filter
- ♦ Micron Filter

Membrane Filtration

- ♦ Reverse Osmosis (RO) for drinking & Hemodialysis
- ♦ Ultra Filtration (UF)
- ♦ Nano Filtration (NF)

ION Exchange Process

- ♦ Softener
- ♦ Demineralization
- ♦ Mixed Bed
- ♦ Electro Deionization
- ♦ Ammonia Removal

Disinfection

- ♦ Ultraviolet (UV)
- ♦ Chemical
- ♦ Chlorination for community water supply projects.

Waste Water Treatment Plant

Sewage Treatment Plant (STP)

Sewage treatment is the process of removing contaminants from waste water and household sewage. It includes physical, chemical and biological processes to remove physical, chemical and biological contaminants to produce an environmentally safe fluid waste stream (or treated effluent) and solid waste (or treated sludge) suitable for disposal or reuse. Using advanced technology, it is now possible to reuse sewage treated water for flushing, gardening etc.

Effluent Treatment Plant (ETP)

ETP is the process of removing contamination from industrial wastage. It includes bar screen, oil and grease remover, chemical dosing, air blower, tube settler, MBBR process to separate physical, chemical and biological contaminations. Treated effluent is suitable for reuse. Actual design of the Waste Water Treatment Scheme shall be as per specification and customization as per the customers' requirements.
